DRY CLEANER · WET ONLY

# Wet Only Starter Pack

A modern dry cleaner for opening a shop: wash, dry, iron and bag, with BÜFA Care 4.0 chemistry only. No solvent machine. Essential equipment now, with room to extend later.

## Who it is for

- A new dry cleaner that opens on wet cleaning from day one.
- A shop whose work is covered by water, not by perc.
- An owner who wants a lower opening investment than a full solvent and finishing line.

## The line

| ROLE | MACHINE | POINTS FROM THE TECHNICAL SHEET |
|---|---|---|
| Wash | **Fagor LA-14 TP2 E** | 13/14 kg · 130 L · G-factor 500 · 9 kW heating · 788 × 869 × 1,307 mm · 236 kg |
| Dry | **Fagor SR-18 TP2 PLUS E** | 16.5/18.3 kg · 330 L · electric 18 kW · exhaust Ø 200 mm · 785 × 1,125 × 1,694 mm · 187 kg |
| Iron | **VEIT Varioline CR2** | Board 1,400 × 500 mm · suction and blowing · 0.95 kW · 1,620 × 700 × 2,100 mm |
| Steam | **VEIT SG66** | 2.2 kW · about 3 kg/h · one iron · 230 V · mounts on the table |
| Bag | **HAWO HP630 KST** | Bag sealer for the delivery bag |
| Dosing | **Dosing pumps** | Automatic dose of Polar, Carat, Citro and Protect Pro on every cycle |

Figures from the Fagor LA TP2, Fagor SR-18 TP2, VEIT Varioline CR2 and VEIT SG66 / 2366 sheets. The study confirms the E / PLUS E version and the utilities of the actual room.

## How a garment moves

1. At intake it is sorted only into light and dark — not by fibre.
2. The drum is filled to at least 60%. Dosing is automatic.
3. The LA-14 TP2 E washes with low mechanical action and spins at G-factor 500, so drying is shorter.
4. The SR-18 TP2 PLUS E dries gently. Exhaust air is Ø 200 mm.
5. The Varioline CR2 finishes the garment with steam from the SG66.
6. The HP630 KST seals the bag. The garment leaves ready for the customer.

Care 4.0 process target: cleaning, drying and finishing in about one hour, with about 30% less chemistry than traditional wet cleaning. Times depend on load and program.

## Chemistry — BÜFA Care 4.0 only

**Ozerna Polar** — detergent, colour care

**Lizerna Carat** — protection for wool and delicates

**Lizerna Citro** — pH neutralising

**Lizerna Protect Pro** — PFAS-free finishing

Protect Pro replaces the former Lizerna Conditioner. This pack has no second chemistry line and no perc machine.

### TARAX takes on

- The equipment in the line
- Space and utilities study
- Care 4.0 programs and dosing setup
- Commissioning and training

### You prepare

- Room, water, drain, electrical board
- Dryer exhaust Ø 200 mm
- Operating permits
- Counter and a stock of bags / chemistry

## Not included — a second step

- A solvent dry-cleaning machine.
- A press, tunnel finisher or second table.
- A separate spotting station. The pack's SG66 feeds one iron.

NEXT STEP

### A space study, with no obligation

Tell us the dimensions and the expected volume. We come back with the line, utilities and training. A price follows the study.
